

#56 - Our Voice/Pluraversal Services: Project Platypus

[Our Voice/Pluraversal Services](#) is a professional services organisation that provides multidisciplinary consulting and business support solutions across a range of industries. The company focuses on delivering innovative, client-centred services that help organisations improve operational effectiveness, navigate complex challenges, and support sustainable growth. Through strategic collaboration, tailored solutions, and a strong emphasis on adaptability and innovation, Pluraversal Services aims to support businesses and communities in an evolving global environment.

Your project:

This project asks students to build a framework for non-human species to participate in policy via AI

Outcome:

Pluraversal Services would like a research and technical paper that demonstrates how the model could be built, scaled and integrated into human decision-making systems

Project Milestone:

Week 1	Expected Deliverables (Ontology & Framing) Goal: demonstrate a coherent, defensible model of “species interests” that can generalise beyond a single case.
Week 2	System Architecture & Model Design Goal: Show a scalable, species-agnostic system design that could actually be built.
Week 3	Participation, Governance & Institutional Fit Goal: Demonstrate how this system actually operates inside real decision-making environments.

Week 4	Economics, Deployment & Strategy Goal: Show how this becomes real: funded, adopted, and scaled.

Useful Links and additional information:

Pluraversal Services will support you with industry-specific knowledge and advice.

This project falls under the following categories :

- ☐ Consultancy and Strategy
 - ☐ Finance and E-commerce
 - ☒ **Global Health and Wellbeing**
 - ☐ Marketing and Social Media
 - ☒ **Research and Business Development**
 - ☒ **Sustainability and Social Impact**
 - ☒ **Technology, Data and Innovation**
-

Applicable United Nations Sustainable Development Goals (UNSDGs):

Student Team – things to consider:

- Research the Organisation before you have your introductory meeting with the Organisation Mentor
- Ensure you've thoroughly read the brief & discussed with your teammates initial ideas and thoughts
- Prepare questions for your Organisation Mentor
- Think about how you will allocate work between you and a potential timeline for completion
- Remember to ask the Organisation Mentor how they want your findings to be reported back to them
